Round Shape Stickers

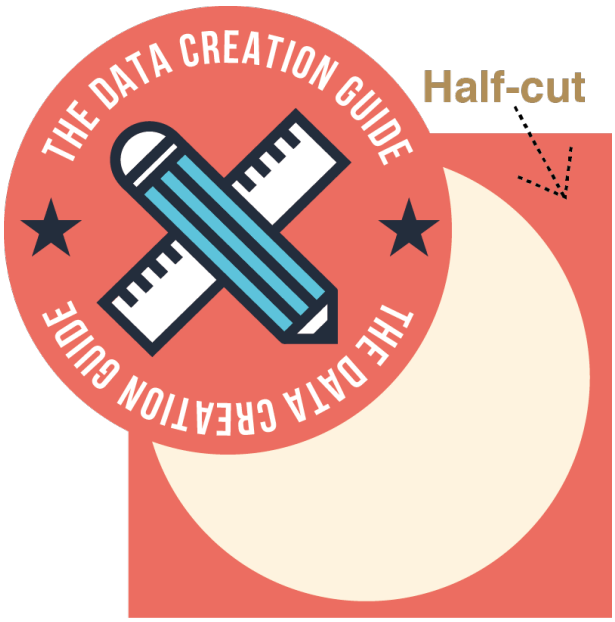

Half-cut round stickers | Using the Illustrator round sticker templates

Half-cut round stickers

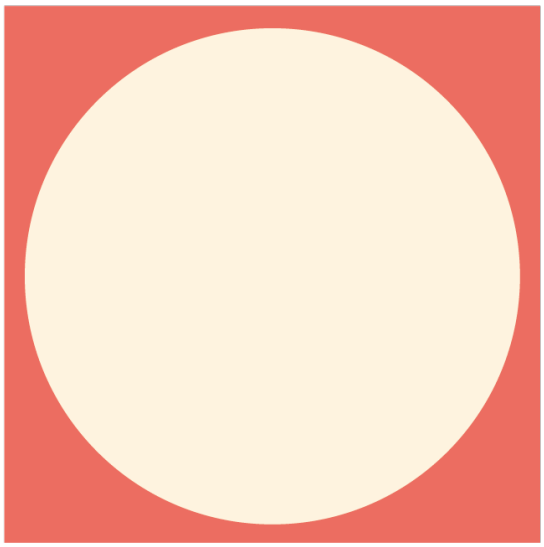

To make it a little easier to peel off and apply your awesome round stickers, we kiss cut them all before they get packaged and shipped out to you. What is a kiss cut? Using a metal die (think of a round shape cookie cutter with really sharp edges) we only cut the sticky part of your sticker, without cutting all the way through to the back paper.

Final Trimmed Size

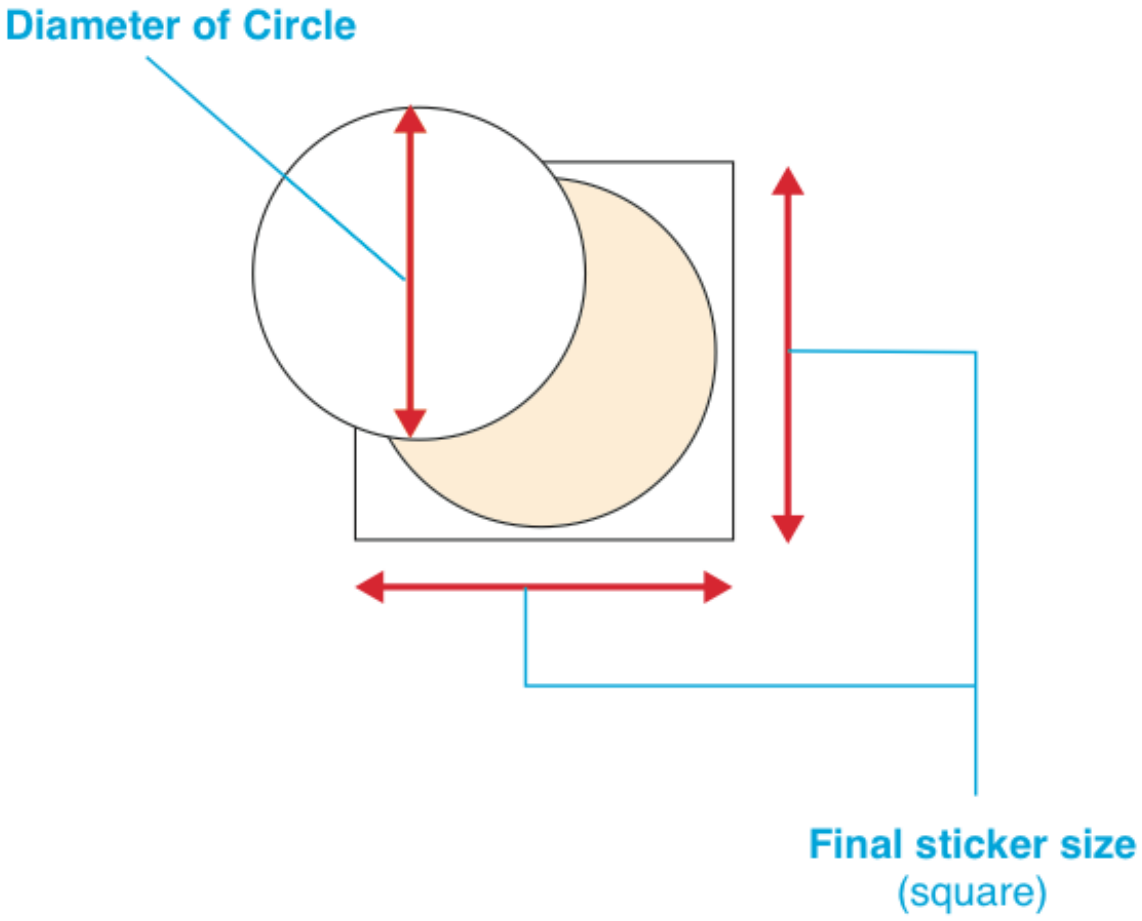

Left over sticker portion

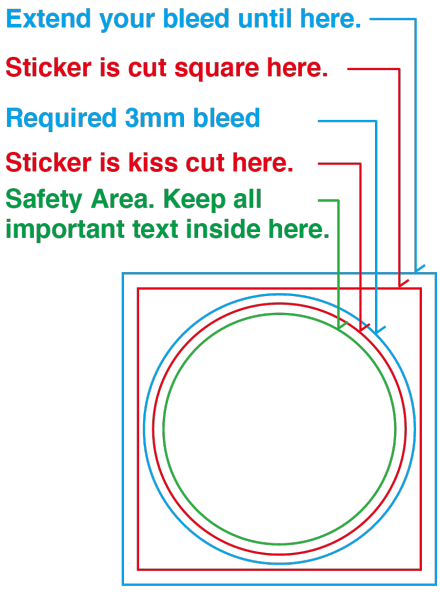

At Metro Print we carry 9 popular round sticker sizes. All the sizes are measured in diameter. Because the smallest size we can trim anything down to is 50x50mm, and the 30mm round and 40mm round stickers are smaller than that size, the final sticker size for both 30mm round and 40mm round is 50x50mm (square) sticker. Please refer to the illustration and chart below.

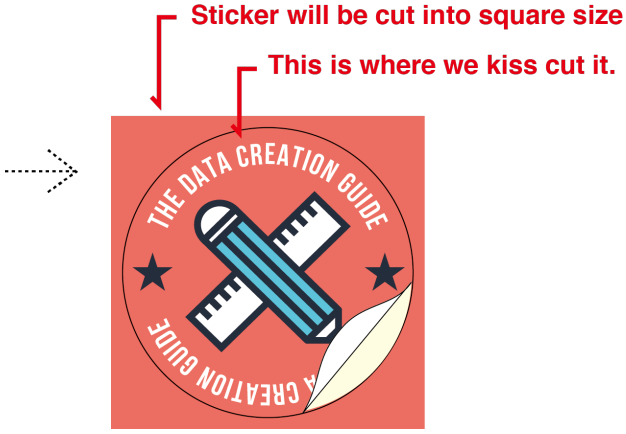

Diameter of Circle	Final sticker size (square)
30mm round	50x50mm
40mm round	50x50mm
50mm round	56x56mm
60mm round	66x66mm
70mm round	76x76mm
80mm round	86x86mm
90mm round	96x96mm
100mm round	106x106mm
120mm round	126x126mm

Using the illustrator round sticker templates

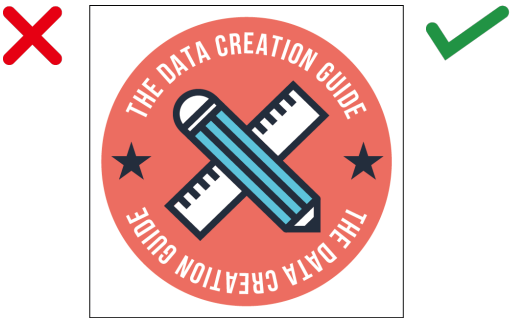

First, lets open up one of our round sticker templates. Each template comes setup with the required trim marks and guides, so all you need to do is just set your design up. If you do not see these guides, you must first enable your guides. From the View menu, choose Guides > Show Guides.
